

BROCO RECOVERY & RESCUE TORCH

PRIME-CUT PC/A-5V2HR

NSN: 3433 01 554 9829

Broco torches were used for the World Trade Center rescue efforts.

The PC/A-5V2HR

Rescue & Repair torch is the most recent evolution of the Prime Cut industrial backpacked torch. It meets the requirements of Urban Search And Rescue teams for both confined space and extended cutting operations. Torch is setup with 5' hose and cable. Included in the kit is the 25' heavy rescue extension set. Attach the quick connect battery clamps to utilize a standard auto type 12 volt battery, bring up a shop sized oxygen cylinder and it is ready to do a lot of heavy cutting.

Also included is an 18" rod extender for extra reach (or standoff), an oxygen transfill hose assembly to recharge cylinders in the field, and a medical oxygen adapter so D & E cylinders with the post valves can be used with the torch. The Broco backpack can be integrated with many SCBA systems (extra cylinder bag required) to put cutting and breathing capability on one platform. Everything fits in a rugged storage case (included).

This kit is suitable for use on rescue trucks, wreckers and for military repair applications. A NATO plug is available to operate the PC/A-5V2HR directly from a military vehicle's battery system.
